Objective

Avoid collecting jester heads (penalty points) by strategically playing your cards.
The player with the fewest points at the end wins.

Game Setup

- Each player is dealt 5 - 10 cards from a deck of 104 (numbered 1–104).
- Four cards are placed face-up on the table to form the initial rows.

Round Play

- Every round, players secretly choose one card from their hand.
- All chosen cards are revealed simultaneously.

Card Ordering & Placement

- Revealed cards are automatically sorted in ascending order.
- Each card is placed at the end of the row where the last card is the highest number lower than the played card.

Row Overflow

- If placing a card would make a row exceed five cards (i.e., become the 6th card), that row “bursts.”
- The player who played the card collects the five cards from that row (adding their bullheads to their score), and the played card becomes the new row starter.

Special Placement Rule

- If your played card is lower than the last card in every row, you must choose one row to collect.
- Your card then becomes the starting card for that row.

6 TAKES!

Welcome!
